

1999

"Differential Geometry in Chemical Reaction Dynamics," A. Tachibana, in "The Transition State - A Theoretical Approach," Ed. by T. Fueno (Kodansha, Tokyo; Gordon and Breach, Amsterdam, 1999), pp. 217-247.

"Chemical Potential Inequality Principle," A. Tachibana, *Theoretical Chemistry Accounts*, 102, 188-195 (1999).

"A Simple Algorithm for Conservation of Invariants of Motion in Reaction Dynamics Calculations: Application to the $\text{NH}_3^+ + \text{NH}_3$ System," A. Tachibana and M. Fujii, *J. Chem. Phys.*, 110, 2323-2331 (1999).

"The Geometry and Mechanics of Multiparticle Systems," T. Iwai and A. Tachibana, *Ann. Inst. Henri Poincaré*, 70, 525-559 (1999).

"Application of the Regional Density Functional Theory: the Chemical Potential Inequality in HeH^+ System," A. Tachibana, K. Nakamura, K. Sakata, and T. Morisaki, *Int. J. Quantum Chem.*, **74**, 669-679 (1999).

"Quantum Chemical Studies of Gas Phase Reactions between TMA, TMG, TMI and NH_3 ," A. Tachibana, O. Makino, S. Tanimura, H. Tokunaga, N. Akutsu, and K. Matsumoto, in "Proc. 3rd Int. Conf. Nitride Semiconductors, Montpellier (France), July 5-9, 1999; *phys. stat. sol. (a)* **176**, 699-703 (1999).

"Quantum Chemical Study of Low Pressure Gas Phase Cationic Polymerization Reactions in the System of Ti^+ and Isobutylene," A. Tachibana and K. Nakamura, *J. Mol. Structure (Theochem)*, 461-462, 269-281 (1999).

"Quantum Chemical Study of Model Reaction for CVD of Titanium Nitride from Alkylamido Titanium and Ammonia," K. Nakamura and A. Tachibana, in "Advanced Metalization and Interconnect Systems for ULSI Applications in 1998," Eds. by G. S. Sandhu, et al. (Materials Research Society, 1999), pp. 393-398.

"Quantum Chemical Study of Cu CVD Using Precursors with Alkoxysilylolefin Ligands," K. Nakamura, M. Fuju, and A. Tachibana, in "Advanced Metalization and Interconnect Systems for ULSI Applications in 1998," Eds. by G. S. Sandhu, et al. (Materials Research Society, 1999), pp. 153-158.

"Quantum Chemical Study of Ion-Molecule Reactions in $N_2^+ + O_2$ System," A. Tachibana, K. Nakamura, T. Yano, Y. Sugiyama, and S. Tanimura, *J. Phys. Chem.*, **103**, 5749-5757 (1999).
