

**2002**

" First-Principle Theoretical Study on the Dynamical Electronic Characteristics of Electromigration in the Bulk, Surface and Grain Boundary," A. Tachibana, in *Stress Induced Phenomena in Metallization*, edited by S. P. Baker (American Institute of Physics, New York, 2002), pp. 105-116.

" Energy Density in Materials and Chemical Reaction Systems," A. Tachibana, in *Reviews in Modern Quantum Chemistry: A Celebration of the Contributions of Robert Parr*, edited by K. D. Sen, (World Scientific, Singapore, 2002), Chap. 45, pp. 1327-1366.

"High-spin electronic interaction of small lithium and sodium cluster formation in the excited states," S. Hotta, K. Doi, K. Nakamura, and A. Tachibana, *J. Chem. Phys.*, **117**, 142-152 (2002).

" Quantum chemical study of gas-phase reactions of trimethylaluminium and triethylaluminium with ammonia in III-V nitride semiconductor crystal growth," M. Ikenaga, K. Nakamura, A. Tachibana and K. Matsumoto, *J. Crystal Growth*, **237-239**, 936-941(2002).
